Subject Camry Floor Mat recall

I am a Manager in Dino's group, in the Quality Control Mgmt (QCM) section. We are responsible for over-seeing the quality function at the plants, and get involved with establishment of various systems, policies and rules as it relates to quality. We have been recently studying In-Line Assy and PPO parts issues for Quality.

I realize that this subject may not be tabled until early 2008 at the Quality Function Meeting, but would like to know if there has already been a reflection document prepared for this recall, and if we could get our hands on it. I think this would be very helpful in our study.

Please let me know. Any help would be greatly appreciated.

Thanks
